

PREVESAUURA

For the correct position of the head during surgical interventions, it is common to prepare a cotton bandage ring to protect the head, the neck and the ears, depending on how the patient is positioned.

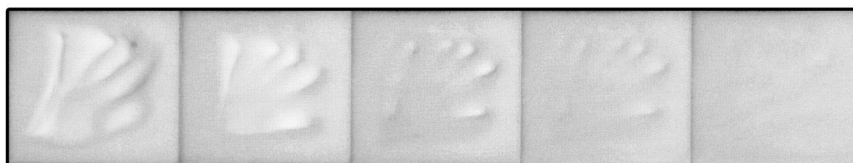

Ref: PR-700
PR-710

2miil presents its product PREVASAUURA consisting of two foam rings of different thickness per m² and of different internal diameter sizes. The rings come placed in 100% cotton cover that acts as a pillow and allows transpiration and the absorption of fluids.

Available in two sizes:
Adult (PR-700) and Paediatric (PR-710)

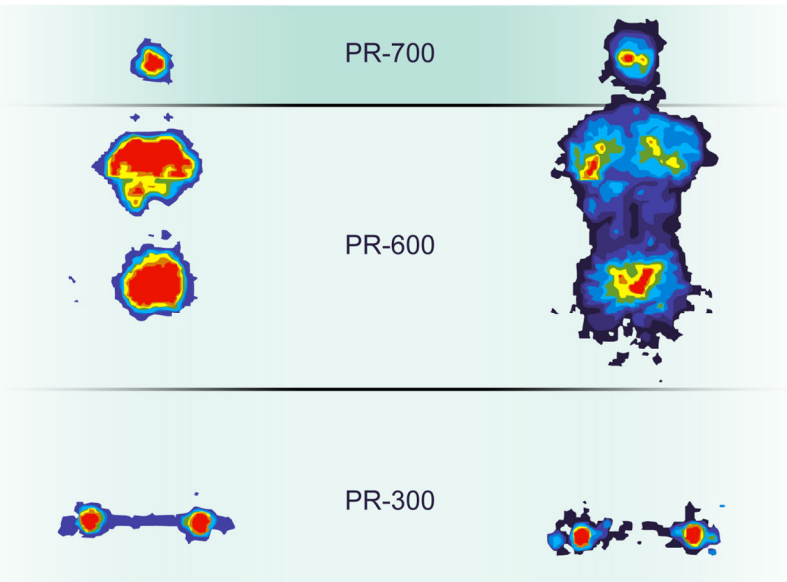

PREVENTION OF BEDSORES IN THE HEAD AREA

(fig.1)

NORMAL MATTRESS

VISCOELASTIC MATTRESS

Red areas are those parts of the body that exert more pressure, noticing in blue (VISCOELASTIC) as the body pressure is uniformly distributed.

Thanks to the viscolastic, pressure risk is reduced so the general distribution improves in between 3 and 4 times.

(fig.1) Adaptation and recovery of viscoelastic material in contact with human body.
